DESIGN TILES

Design tiles are exceptionally durable and a perfect alternative to standard interlock tiles. Our design tiles come in wide range of colours, textures and patterns providing countless design options. We utilize high quality materials including terrazzo chips to ensure the longevity of the colour and gloss surpasses that of interlock tile. Design tiles are recommended for walkways, courtyards, pool areas and private driveways.

Benefits of Design Tile

- High level of customization
- Long lasting colour and shine
- Provides a polished appearance
- Non-slip surface
- Low maintenance

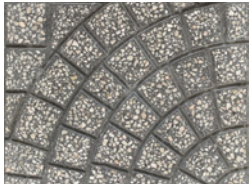

Muttrah Corniche, Muscat

DESIGN TILES

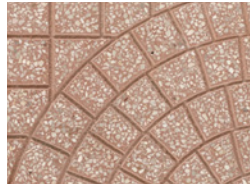

Design Tiles are available in two variants:

- Concrete/Cement Type–These are unpolished & without a Terrazzo surface
- Terrazzo Type–These have a polished surface

A surface sealer is available for Design Tiles, this would be applied after installation. Additional colours are also available. Please speak with your sales representative for more information on both of these options.

EXPOSED AGGREGATE TILE

Inspired by nature, our exposed aggregate tiles are made from natural materials and offer many functional and aesthetic benefits.

Exposed aggregate tiles are constructed with concrete making it exceptionally durable and suited for high traffic areas such as walkways. Its non-slip surface makes it the perfect choice for families with pools or areas of incline. Exposed aggregate is also ideal for landscaping projects as it blends in well with the natural surroundings.

GARDEN ACCESSORIES

Complete your garden with our custom made terrazzo planters, water features, benches and tables. Originating in Italy in the 18th century, Terrazzo is considered one of the most environmentally friendly construction materials available. It offers exceptional longevity, is highly sun resistant and requires minimal maintenance.

TERRAZZO TREAD AND RISERS

ATTf manually fabricates customized treads and risers based on individual client requirements.

We offer the following options:

- Treads with or without grooves
- Treads unfilled or filled with carborendum powder, brass or stainless steel strips
- Treads and risers with the same or contrast color
- Steps and risers with standard or yellow stone surface finish
